DESCRIPTION

This is a program that will allow you to remove and delete any aircraft (including the gauges files used by it) installed in your Microsoft Flight Simulator's folder. Note: this program will not remove any shared gauge file used by others aircrafts. Also it removes the unused gauges files. Doesnt requires any earlier version. Requires the Manuel's Service Pack 3.

Created by Manuel Ambulo

INSTALLING AIRCRAFT AND GAUGES UNINSTALLER

If you have installed a previous version of the Manuel's Service Pack (Manuel's Service Pack 2), then you will need to uninstall it, in order to do this, you have to go to your window's "Start", "Settings", then "Control Panel"; now double-click the "Add/Remove Programs" icon, and from the list, select "Manuel's Service Pack 2", then click the "Add/Remove..." button.

NOTE: If appears a message box (during the uninstall process of the previous version of the Manuel's Service Pack), telling you that if you want to remove the shared files. I recommend you to click the "Remove None" button, because there are maybe some programs using those shared files, that's why it is recommended to keep those shared files.

Or if you didnt had downloaded any Manuel's Service Pack, before, then dont worry, and continue the reading below.

If you dont have installed the "Manuel's Service Pack 3", then you will need to go to the "Required Files" section of my programs homepage (<http://www.joenetwerk.de/manuel>), and download the "Manuel's Service Pack 3", for then install it.

NOTE: Anothers websites, where you can download the "Manuel's Service Pack 3" are: www.flightsim.com and www.simviation.com

- If you have installed any previous version of Aircraft and Gauges Uninstaller:

Uninstall the previous version of Aircraft and Gauges Uninstaller, in order to do

this, you must go to your Window's "Start", "Settings", then "Control Panel",

now double-click the "Add/Remove Programs" icon, and uninstall or remove any

previous version of Aircraft and Gauges Uninstaller, that you find in the list of

programs (Of the "Add/Remove Programs Properties" window).

NOTE: If you didnt found any previous version of Aircraft and Gauges Uninstaller, inside

the list of programs (of the "Add/Remove Programs Properties" window), then dont worry,

and continue reading below.

Because, the Aircraft and Gauges Uninstaller 5.0, was published without an installer and uninstaller programs, you will need to search in all your local hard drives, in order to find that program. Now go to your Window's "Start", "Find", then "Files or folders", and search for this file: "Aircraft and Gauges Uninstaller v50.exe" (within the quotes). If you found that file, then delete the folder, where the "Aircraft and Gauges Uninstaller v50.exe" file is located (within all the files inside of that folder).

NOTE: If you didnt found the "Aircraft and Gauges Uninstaller v50.exe" file, then dont worry, and continue reading below.

Now, run the Aircraft and Gauges Uninstaller v6.0 setup program, inside the airgau60.zip file.

- If you dont have installed any previous version of Aircraft and Gauges Uninstaller:

Now, run the Aircraft and Gauges Uninstaller v6.0 setup program, inside the airgau60.zip file.

USAGE OF AIRCRAFT AND GAUGES UNINSTALLER

This program is simple and easy to use, follow these easy steps:

- 1- Run "Aircraft and Gauges Uninstaller v60.exe".
- 2- Wait until it's load.
- 3- Will appear the "Settings" window.
- 4- You must select the Microsoft Flight Simulator Version from which you want to remove an aircraft's files.
- 5- You must choose or select your's Microsoft Flight Simulator's main path or folder.
- 6- You must click in the "NEXT STEP" button.
- 7- Wait until "Aircraft and Gauges Uninstaller" get's all the information about aicrafts files installed in your Microsoft Flight Simulator's main folder. After this process, this program will ask you, if you want to remove the unused gauges files. If you press "Yes", it will automatly remove the unused gauges files, and at same time, it will backup those removed gauges files, in the "Unused Gauges" folder, located in the folder, where you installed "Aircraft and Gauges Uninstaller".
- 8- It will appear the "Selecting Aircraft" window. From the list, you must select the aircraft you want to remove and then click the "REMOVE SELECTED AIRCRAFT" button.
- 9- Then it will appear a messagebox asking you for a confirmation of the remove of the selected aircraft.
- 10- Then it will appear another messagebox asking you for the remove of the gauges files used by the "panel.cfg" file of the selected aircraft.

Readme

NOTE: This program will not remove any shared gauges files used by others "panel.cfg" files of the others aircrafts, in others words, will only remove that non-shared gauges files, that are not currently been set by other "panel.cfg" file. And also it will not remove the gauges files of the "panel.cfg" files that use the "ALIAS" command.

- 11- Wait until it finish the removing process.
- 12- The it will appear a messagebox notifying you that the process was successfully completed.
- 13- Then at this moment it will refresh or reload the aircrafts list, in case you want to remove another aircraft.

NOTE: This program stores all the removed files in a Temporal Folder called "Temp_Path" located at the "Aircraft and Gauges Uninstaller" folder. This program stores the removed aircrafts files, in case this program fails or in case you want to reinstall the removed aircrafts files.

REMOVE THE FILES STORE IN THE TEMPORALY FOLDER

If you want to remove permanently all the removed aircraft files stored in the "Temp_Path" (Temporal Folder) folder, then you must click in the "Aircraft and Gauges Uninstaller" menu, "Temporal_Folder", then click "Empty Folder" and then wait until the remove process is complete.

REMOVE THE FILES STORE IN THE UNUSED GAUGES FOLDER

If you want to remove permanently all the removed unused gauges files stored in the "Unused Gauges" folder, then you must click in the "Aircraft and Gauges Uninstaller" menu, "Unused_Gauges_Folder", then click "Empty Folder" and then wait until the remove process is complete.

UNINSTALLING AIRCRAFT AND GAUGES UNINSTALLER

If you want to uninstall the Aircraft and Gauges Uninstaller program, you can go to your Window's "Start", "Settings", then "Control Panel". Now double-click the "Add/Remove Programs" icon, now from the list, select "Aircraft and Gauges Uninstaller v6.0" and click the "Add/Remove..." button.

KNOWN BUGS

-NONE-

NOTE: If you find a bug, please report it to me by e-mail.

MESSAGE FROM THE AUTHOR

I made this program because there is a lot of flightsimmers that have troubles when they want to remove or delete an aircraft's files and the gauges files used by that aircraft. Then to solve this problem, i made this program, for do all the hard work. I hope this can help you with the problem of the "hard drive space" caused by the great
