MANUEL'S SERVICE PACK 3

DESCRIPTION

The "Manuel's Service Pack 3" (manSP3.zip) is a package that have important and necessary files required by the Manuel Ambulo's Flight Simulator's programs: ATC Radar Screen, Airport's Chart Viewer, Artificial Intelligent ATC, and Aircraft & Gauges Uninstaller.

INSTALLATION OF MANUEL'S SERVICE PACK 3

- 1- If you have installed the "Manuel's Service Pack 2", in your computer, then uninstall it, before continue.
- 2- Unzip the "manSP3.zip" into your window's Temp folder, and then go to your window's Temp Folder, and open the "Manuel's Service Pack 3" folder, and then run the "setup.exe" program.

IMPORTANT NOTE: Once you had installed the "Manuel's Service Pack 3", you dont need to install it again.

FILES INCLUDED IN THIS SERVICE PACK

- 1- Manuel Database Creator v1.0: Program that reads or scans all the FS2004/2002 scenery files, for then creates the databases files required by these programs: ATC Radar Screen v5.0 (or any higher version) and Airport's Chart Viewer v4.0 (or any higher version)
- 2- Visual Basic's run-time and component files: Files required for run Visual Basic's applications. Most of the Manuel Ambulo's Flight Simulator's programs were made in Visual Basic's environment.

UNINSTALLING THE MANUEL'S SERVICE PACK 3

IMPORTANT NOTE: Remmember, if you uninstall the "Manuel's Service Pack 3", maybe any of my programs (Airport's Chart Viewer, ATC Radar Screen, Artificial Intelligent ATC and Aircraft & Gauges Uninstaller) couldnt run, because the "Manuel's Service Pack 3", contains required files, that need my programs to run.

Anyway, if you want to uninstall the "Manuel's Service Pack 3", you can go to your window's "Start", "Settings", then "Control Panel". Now doble-click the "Add/Remove Programs" icon, now from the list, select "Manuel's Service Pack 3" and click the "Add/Remove..." button.
